GENERAL INFORMATION:

APPLICANT: Dan, Michael D.

APPLICANT: Saleh, Mansoor

TITLE OF INVENTION: ANTIGEN BINDING FRAGMENTS, DESIGNATED

TITLE OF INVENTION: 485, THAT SPECIFICALLY DETECT CANCER

TITLE OF INVENTION: ENCODING THE FRAGMENTS, AND USE THERE

TITLE OF INVENTION: AND DETECTION OF CANCERS

FILE REFERENCE: 316082001002

CURRENT APPLICATION NUMBER: US/10/290,703

CURRENT FILING DATE: 2002-11-08

PRIOR APPLICATION NUMBER: US 09/747,669

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 12, Application US/0948429B
Patent No. US20020177689A1
GENERAL INFORMATION:
APPLICANT: Anderson, Darrell R.
TITLE OF INVENTION: "MONKEY MONOCLONAL ANTIBODIES SPECIFIC
TITLE OF INVENTION: TO HUMAN B7.1 AND/OS B7.2 PRIMATIZED FORMS THEREOF,
TITLE OF INVENTION: THERMACEUTIAL COMPOSITIONS CONTAINING, AND USE THEREOF AS
TITLE OF INVENTION: IMMUNOSUPPRESANTS"
NUMBER OF SEQUENCES: 12
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Query Match 47.0%; Score 1271; DB 9; Length 476; Best Local Similarity 59.8%; Pred. No. 3.5e-77; Matches 274; Conservative 29; Mismatches 87; Indels 6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              NAME: Teskin, Robin L.

Sequence 12, Application US/10124807
Publication No. US20030166207A1
GENERAL INFORMATION: COMPUTER: IBM PC Compatible OPERATING SYSTEM: PC-DOS/MS-DOS SOFTWARE: PatentIn Release #1.0, CURRENT APPLICATION DATA: APPLICATION NUMBER: US/10/124,80 APPLICATION NUMBER: US 08/487,550 FILING DATE: 07-JUN-1995 BURNS, DOANE, SWECKER & MATHIS , Darrell R.
"MONKEY MONOCLONAL ANTIBODIES SPECIFIC
TO HUMAN B7.1 AND/OR B7.2 PRIMATIZED FORMS THEREOF,
PHARMACEUTIAL COMPOSITIONS CONTAINING, AND USE THER IMMUNOSUPPRESANTS" 09/383,916 US/10/124,807 012712-131 Version #1.30

```
TITLE OF INVENTION: ANTI-CD80 ANTIBODY HAVING ADCC ACTIVITY FOR ADCC
TITLE OF INVENTION: MEDIATED KILLING OF B CELL LYMPHOMA CELLS ALONE OR IN
TITLE OF INVENTION: COMBINATION WITH OTHER THERAPIES
FILE REFERENCE: 037003/291872
CURRENT FILING DATE: 2002-11-12
